ABOUT SOFTTRADERS

For over two decades, Sof-Traders has served as a cornerstone of technological excellence in Pakistan. From our origins as specialists in Oracle ecosystems and enterprise-grade database management, we have evolved into a full-spectrum technology partner. Today, we bridge the gap between legacy reliability and next-generation innovation, delivering solutions in AI, IoT, Mobile Apps, and Automation that empower businesses to scale, transform, and lead in a digital-first world.

MISSION & VISION

Our Mission: To enable business agility and accelerate digital transformation through innovative, reliable, and secure technology solutions.

Our Vision: To be the global benchmark for enterprise excellence, turning complex technological challenges into competitive advantages for our clients.

DEEP FINANCIAL SECTOR EXPERTISE

We understand the unique challenges of the financial industry, including the need for 24/7 uptime, stringent data security, audit compliance, and seamless integration of legacy core banking systems with modern digital platforms. Our expertise is built on a strong foundation of supporting mission-critical financial operations.

CONTINUE

COMPREHENSIVE BANKING SOLUTIONS

- **Core Banking System (CBS) Support**

Specialized technical integration and resident engineering for platforms like iMAL, Flexcube, Symbol, and T24 (Temenos), ensuring seamless transaction processing and stable system migrations.

- **High-Availability Database Systems**

Implementation of Oracle RAC, IBM DB2, and SQL Server to ensure 24/7 availability for critical banking data and zero downtime for ATM and digital banking services.

COMPREHENSIVE BANKING SOLUTIONS

- **Cybersecurity & Identity Management**

Securing sensitive data through Oracle IDM and Audit Vault, managing privileged access and maintaining strict audit trails to meet global financial regulatory standards.

- **Real-Time Data Replication**

Leveraging Oracle Golden Gate for high-speed, zero-downtime data synchronization, essential for real-time reporting and seamless migration between heterogeneous systems.

COMPREHENSIVE BANKING SOLUTIONS

- **Disaster Recovery & Business Continuity**

Deploying Oracle Data Guard, Oracle GoldenGate, and IBM DB2 HADR to guarantee zero data loss and rapid recovery for Microsoft SQL Server, Oracle, and IBM DB2 environments in the event of a system failure.

- **Business Intelligence & Analytics**

Transforming raw data into actionable insights through OBIEE and Oracle Analytics Server, providing executives with real-time dashboards for monitoring risk, liquidity, and institutional performance.

COMPREHENSIVE BANKING SOLUTIONS

- **Enterprise Middleware Solutions**

Managing Oracle WebLogic and IBM WebSphere to ensure secure, high-speed connectivity between core banking backends and customer-facing digital channels.

- **Performance Engineering & Tuning**

Advanced optimization of Oracle and IBM DB2 databases to eliminate system bottlenecks, reduce transaction latency, and improve application responsiveness.

EXPERIENCE

Softtraders team has hands-on experience supporting banks and financial institutions in managing mission-critical systems. Our work spans core banking platforms, enterprise applications, and operational systems where accuracy, security, and uptime are non-negotiable.

STRATEGIC BANKING SERVICES & DELIVERY

- **Multi-Bank Service Excellence:** Our team has served a diverse portfolio of major financial institutions, providing specialized support for interbank payment networks and large-scale commercial banking operations.
- **Critical Infrastructure Management:** We have successfully managed complex data migrations (such as Sybase to Oracle) and implemented first-in-market hardware architectures to facilitate seamless RAC transitions.

STRATEGIC BANKING SERVICES & DELIVERY

- **Performance & Optimization at Scale:** We provide continuous performance tuning and high-availability support for the nation's largest Islamic and conventional banking sectors, ensuring system responsiveness during peak loads.
- **End-to-End Core Implementations:** Our experts have led full-scale implementations of Core Banking Systems and managed critical DBA services to align institutional operations with global standards.

WHY CHOOSE SOFTTRADERS?

- **Proven Reliability:** The Team experience in high-stakes banking environments where 100% uptime is the only option.
- **Deep Domain Knowledge:** We don't just understand code; we understand banking workflows, financial compliance, and operational audits.
- **End-to-End Technology Stack:** From the hardware to the user-facing AI and Mobile App layer.
- **Strategic Resource Deployment:** We provide Resident Engineers and specialized technical teams for on-site support and maintenance.
